[www.safetysignsupplies.co.uk](http://www.safetysignsupplies.co.uk) (warning notices – specifically self-design as illustrated >>>>)

Please note these are not specific recommendations and the list is not exhaustive.

Usual veterinary X-ray equipment suppliers may also be able to assist.

General principle (diagnostic X-ray room) – where extra shielding is required - Code 3 lead (1.32 mm) – applies to partition walls and wooden doors.

Knauf Safeboard – will be 1 or 2 layers (requires confirmation from RPA).
